

CTS Lines & Broadband

CTS now offer Business lines & broadband at highly competitive business rates that could make you significant savings. Let us take a look at your traditional phone bill - we'll do the math and tell you how much you could be saving...it's that simple.

We're like a dog with a bone...

when it comes to saving your business money.

CTS migrate your traditional copper lines to SIP numbers which enables you to take advantage of new, better calling rates and technology. We look after the whole process of porting your numbers over to the new platform and manage any requirements for you.

Traditional lines (POTS) are coming to an end with the advent of more advanced VoIP telephony, Mobile phone, and Computer applications.

Toll Free 0508 & 0800 numbers will continue to provide your clients with the user-friendly experience but at a reduced cost to you, on the CTS VoIP platform.

- CTS can provide integrated services and feature rich options such as
- Simultaneously ringing several numbers
- Send calls to an Auto Attendant
- Send calls to a Conference Room or Voicemail Service
- Call Recording and reporting
- Front End Caller options and Voicemail
- Geographic Routing for multi-branch connections.

There are many options to integrate with your other CMS platforms etc and these services are just an example of what can be achieved.

CTS integrated solutions to improve your business connections.
